

ALIEN ACROSTICS FOUND ON A WALL

Early in the morning of the 22nd of May, 2018, St Peter's Budleigh school's caretaker found alien engravings, on the staff room wall, believed to be from Alpha Centauri.

Strange activity expert, Mrs Ralf, presumed: "it to be caused by an alien race." Mrs Ralf explained that they don't know what it says but called the language ALIEN-Z. Mrs Ralf stated that: "The species is rare and is only found around Alpha Centauri."

"We are currently trying to match the symbols and then translate so that we can communicate." Expressed Mrs Ralf. Our expert does not know if this will happen again but if it does it will only help them. It's happened before 50 times in 50 countries. First found in Texas 1956.

A close neighbour to the school saw a neon blue, glowing light but went back to sleep suspecting it was normal. Mr Harris-Cotton, the school caretaker, was up early that morning trying to figure out what it was. He was interviewed by reporters and quoted that: "IT was early and had no succession in finding anything out."

The writing was some sort of white charcoal from a faraway planet that we don't know of. People even say it's from a world even further than Alpha Centauri.

People around the world don't feel like your in danger because this has happened before and nothing has occurred since.
